TROPHY, NATURAL  
**BROOK TROUT**

# A TRUE WILDERNESS LODGE

OFFERING UNIQUE NATURAL, TROPHY BROOK TROUT ANGLING

Kwagama is situated on a beautiful island surrounded by conifers, hardwoods, and mountain ash, along with numerous wildflowers and berries. Our speckled (brook) trout fishing season begins in early May and lasts until the end of September. Complimentary guide service is provided for day trips to surrounding lakes and streams.

Our comfortable, clean, rustic style cabins are wood heated and have propane lights. Each cabin has separate bedrooms (2 single beds per room), with a large sitting room and an exceptional view of the lake. Each group is assigned their own private cabin. All bedding, linen, and towels are furnished along with daily maid service. Our large sauna and shower is centrally located for your convenience.

Kwagama Lake and its surrounding lakes, rivers, and streams contain native, natural speckled (brook) trout only! Because of our remote location, the fishing has remained excellent. Our average trout ranges from 13 to 17 inches, with quite a few topping the 18 to 25 inch range.

Our main lodge features a large, natural stone fireplace where you can take in spectacular sunrises and sunsets in a warm, relaxing atmosphere. So relax, and let us take care of your every need!

Enjoy home cooked meals served family style in the main dining room. Our traditional menu includes fresh baked breads, desserts, and pastries along with a daily salad bar.

We operate on the American plan only. Our complete package includes meals, accommodation, daily maid service, motor boats, and fuel. Your catch will be tended by our staff, cleaned, wrapped, and frozen for your trip home.
